NEW
MAHADEV
TAKE EVERY OPPORTUNITY HANDED TO YOU

Name : Sharatha Sreen R

Subject : Mobile Computing (Lab)

Std : Sec : Roll No :

School :

S.No.	Date	Title	Page No.	Teacher's Sign / Remarks
1.		Cellular system Components diagram		
2.		Mobile station UI Prototype		
3.		Network switching subsystem flowchart		
4.		Mobile network protocol stack diagram		
5.		Localization App Wireframe		
6.		Mobile Network Handoff Simulation		
7.		Cellular System dashboard		
8.		PLMN Infographic		
9.		GSM Suisse UI Prototype		
10.		Multiple Access Technique Comparison		
11.		Secure mobile app wireframe		
12.		1G to 5G Evolution diagram		
13.		Mobile communication (Vs) Mobile Computing infographic		
14.		GPRS Operation flowchart		
15.		Mobile IP Issues Presentation		
16.		Mobile IP Routing Protocols		
17.		Ad Hoc network App		
18.		Android Vs ios Vs Windows		
19.		Android app UI Protocols .		
20.		Power Management app .		

Exp01: Use Figma to create an interactive diagram.

Aim:

To create an interactive diagram illustrating the components of a basic cellular system.

Procedure:

- i) Open figma
- ii) Create new file
- iii) Select the frames
- iv) Fill in the content
- v) Design visual elements
- vi) Make it interactive
- vii) Add annotations
- viii) Storyboard animations
- ix) Review and edit it
- x) Save and share

Result:

Hence an interactive diagram using figma was created successfully.

Exp 02: Design a user interface prototype for a mobile station using figma, considering connectivity and convenience.

Aim:

To make a user interface prototype for a mobile station using figma, considering connectivity and convenience.

Procedure:

- i) Open figma
- ii) Create new file
- iii) Select the frames
- iv) Design Visual elements
- v) Make it interactive
- vi) Add icons
- vii) Incorporate Multimedia
- viii) Storyboard Animation
- ix) Review and Edit it
- x) Save and Share

Result:

Thus, A user interface prototype for a mobile station using figma was successfully executed.

✓

Exp 03: Develop a flowchart in figma depicting the operation of a network switching subsystem in a mobile cellular system.

Aim: To draw a flowchart in figma depicting the operation of network switching subsystem in a mobile cellular system.

Procedure:

- i) Open figma
- ii) Create new file
- iii) Click on the resources icon & click it
- iv) Search flow chart
- v) Drag and drop the shapes on screen
- vi) Grouping alignment
- vii) Review and Edit
- viii) Save and Share.

Result:

Hence, the flowchart is figma depicting the operation of a network switching subsystem in a mobile cellular has been successfully drawn.

Exp 04: Create a visual representation in figma highlighting the key elements of mobile network protocol stacks.

Aim:

Design a visual representation in figma highlighting the key elements of mobile network protocol stacks.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Fill in the content that is required for - presentation
- v) Design visual elements
- vi) Make it interactive
- vii) Review and Edit it
- viii) Save and share.

Result:

Hence the visual representation in figma highlighting the key elements of mobile network is created and executed successfully

Exp 05: Design a wireframe for a mobile application that incorporates localization features using figma.

Aim: To design a wireframe using figma for a mobile application that incorporate localization features.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Design visual elements
- v) Make it interactive
- vi) Add icons on the frame
- vii) Review and edit the prototype
- viii) Save and share.

Result:

Here, the wireframe for a mobile application that incorporates localization features using figma is executed successfully.

Exp 06: Use figma to simulate a handoff scenario in a mobile network and visualize the process.

Aim:

To simulate a handoff scenario in a mobile network and visualize the process using figma.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Fill in the content that is required for presentation.
- v) Design visual elements
- vi) Make it interactive
- vii) Add annotations
- viii) Storyboard animations
- ix) Review and edit the prototype
- x) Save and Share.

Result: Hence the simulated handoff scenario in a mobile network & visualized the process using figma is executed successfully.

Exp 07: Develop a dashboard prototype in figma displaying performance criteria for a cellular system.

Aim: To develop a dashboard prototype in figma displaying performance criteria for a cellular system.

Procedure:

- i) Open figma
- ii) Create new file
- iii) Select the frames
- iv) Fill the content
- v) Design visual elements
- vi) Make it interactive
- vii) Add annotations
- viii) Review and edit the prototype
- ix) Save and Share.

Result: Hence developed a dashboard prototype in figma explaining performance criteria for cellular system is executed successfully.

Exp 08: Create an infographic in figma explaining the concept of public land mobile network (PLMN).

Aim:

To create an infographic in figma explaining the concept of public land mobile network (PLMN).

Procedure:

- i) Open figma
- ii) Create new file
- iii) Select the frames
- iv) Fill up the content
- v) Design visual elements
- vi) Make it interactive
- vii) Add annotations
- viii) Storyboard animation
- ix) Review & edit the prototype
- x) Save and share.

Result:

I have created an infographic in figma explaining the concept of PLMN is executed successfully.

Expo9: Develop a user interface prototype for a GSM service using figma.

Aim: To develop a user interface prototype for a GSM service using figma.

Procedure:

- i) Open figma
- ii) Create new file
- iii) Select the frames
- iv) fill in the content that is required for presentation
- v) Design Visual elements
- vi) Make it interactive
- vii) Add annotations and explanation.
- ix) Storyboard animations.
- x) Review and edit it
- xi) Save and share.

Result: Here developed a user interface prototype for a GSM service using figma was executed successfully.

Explo: Create a visual representation in figma showcasing the difference between access techniques.

Aim:

To create a visual representation in figma showcasing the difference between various multiple access techniques.

Procedure:

- i) Open figma
- ii) Create new file
- iii) Select the frames
- iv) Fill in the content
- v) Design visual elements
- vi) Make it interactive
- vii) Add annotations.
- viii) Incorporate multimedia
- ix) Storyboard animation
- x) Review and edit it
- xi) Save and Share.

Result:

Here created a visual representation in figma showcasing the difference b/w various multiple access techniques was created successfully.

Exp II: Design a wireframe for a mobile applications that incorporates security measures using figma.

Aim: Using figma design a wireframe for a mobile application that incorporates security measures.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Design Visual elements
- v) Make it interactive
- vi) Add icons on the frame
- vii) Incorporate multimedia
- viii) Storyboard animations
- ix) Review & edit
- x) Save and Share.

Result: A Wireframe for a mobile application that incorporates security measures using figma is created & executed successfully.

Exp 12: Use figma to create an interactive diagram illustrating the evolution from 1A to 5A.

Aim: To design an interaction diagram illustrating the evolution from 1A to 5A using figma.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Fill the content
- v) Design visual elements
- vi) Make it interactive
- vii) Add annotations
- viii) Storyboard animations
- ix) Review and edit
- x) Save and share.

Result: Hence an interactive diagram illustrating the evolution from 1A to 5A using figma has been successfully executed.

Exp 18: Design an Infographic in figma comparing mobile communication and mobile Computing.

Aim: Using figma design an infographic comparing mobile application & mobile Computing.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frame
- iv) Fill in the content
- v) Design Visual elements
- vi) Make it interactive
- vii) Add annotations
- viii) Storyboard animation
- ix) Review and edit
- x) Save and Share

Result: An infographic design in figma comparing mobile communication & mobile Computing was created successfully.

Exp 14: Develop a flowchart in figma explaining the operation of general packet radio service (GPRS)

Aim:

Draw a flowchart in figma explaining the operation of general packet radio service.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) click on the resources icon
- iv) Search for flow chart
- v) Drag & drop the shapes on the screen
- vi) Now, Enter the content on the shapes
- vii) Grouping & alignment
- viii) Review, Save and share.

Result:

Hence, the flowchart in figma explaining the operation of general packet radio service has been drawn successfully.

Exp 15: Design an interactive presentation in figma explaining the issues in mobile IP.

Aim: To design an interactive presentation in figma explaining the issues in mobile IP.

Procedure:

- i) Define presentation structure
- ii) Create a figma project
- iii) Design Visual elements
- iv) Make it interactive
- v) Add annotations & explanations
- vi) Incorporate multimedia
- vii) Storyboard animation
- viii) Test the prototype
- ix) Collaborate & gather feedback
- x) Finalize & share.

Result: Hence, the interactive presentation in figma explaining the issues in mobile IP is Created & Executed successfully.

Exp 16: Develop a wireframe for a mobile application that addresses challenge related to ADHOC wireless network using figma.

Aim:

Create a wireframe for a mobile application that addresses challenge related to ADHOC wireless network using figma.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Design Visual elements
- v) Make it interactive
- vi) Add icons on the frame
- vii) Incorporate multimedia
- viii) Storyboard animation
- ix) Review & edit
- x) Save & Share.

Result: Hence, a wireframe for a mobile application that addresses challenge related to ADHOC using figma was executed successfully

Exp17: Create a visual representation in figura illustrating the operation of proactive and reactive routing protocols in mobile IP.

Aim: To create a visual representation in figura illustrating the operation of proactive & reactive routing protocols in mobile IP.

Procedure:

- i) Define presentation structure
- ii) Create a figura project
- iii) Design Visual elements
- iv) Make it interactive
- v) Add annotations & Explanations
- vi) Incorporate multimedia
- vii) Storyboard animation
- viii) test the prototype
- ix) Collaborate & gather feedback
- x) Finalize & share

Result: Hence the illustrating the operation of proactive & reactive routing protocols in mobile IP is created & executed successfully.

Exp 18: Use figma to create an infographic comparing and contrasting the architecture of android, ios & windows.

Aim:

To use figma to create an infographic comparing and contrasting the architecture of android, ios & windows.

Procedure:

- i) Define presentation structure
- ii) Create a figma project
- iii) Design Visual elements
- iv) Make it interactive
- v) Add annotations & Explanations
- vi) Incorporate Multimedia
- vii) Storyboard animation
- viii) test the prototype
- ix) Collaborate & gather feedback
- x) Finalize and share.

Result: Hence the comparing and contrasting

Exp:19 Develop a user interface prototype for an android application using figma.

Aim: To develop a user interface prototype for an android application using figma.

Procedure:

- i) Create a file
- ii) Add the first frame
- iii) Add shapes
- iv) Add text
- v) Create the second frame
- vi) Add prototyping.

Result:

Hence to develop a user interface prototype for an android application using figma has been executed successfully.

Exp 20 : Design a wireframe in figma for a mobile application showcasing power management approaches.

Aim : To design a wireframe in figma for a mobile application showcasing power management approaches.

Procedure :

- i) Create a file
- ii) Add the first frame
- iii) Add shapes
- iv) Add text
- v) Create the second frame
- vi) Add prototyping .

Result : Hence the mobile application showcasing power management was executed successfully.

Exp 21: In figma, design a mobile app interface that prioritizes user connectivity & Convenience.

Aim: To design a mobile app interface that prioritizes user connectivity and Convenience.

Procedure:

- i) Create a file
- ii) Add the first frame
- iii) Add shapes
- iv) Add text
- v) Create the second frame
- vi) Add prototyping.

Result:

Hence the mobile app interface that prioritizes user connectivity created and executed successfully.

Exp 22: Create a wireframe illustrating how localization features can be integrated into a mobile app, ensuring a user-friendly design in figma.

Aim: To illustrate how localization features can be integrated into a mobile app using figma.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Design Visual elements
- v) Make it interactive
- vi) Add icons on the frame
- vii) Incorporate multimedia
- viii) Storyboard animation
- ix) Review and edit the prototype
- x) Save and share.

Result: Hence the localization features can be integrated into a mobile app is created and executed successfully.

Exp 23: Develop a user interface prototype in figma showcasing security measures for mobile app.

Aim: Developing a user interface prototype in figma showcasing security measures for a mobile app.

Procedure:

- i) Define presentation structure
- ii) Create a figma project
- iii) Design Visual elements
- iv) Make it interactive
- v) Add annotations & Explanations
- vi) Incorporate multimedia
- vii) Storyboard animation
- viii) Test the prototype
- ix) Collaborate and gather feedback
- x) Finalize and share.

Result: Hence an user interface prototype in figma showcasing security measures for a app have been created successfully.

Exp 24: Use figma to design a flowchart demonstrating the lifecycle of an android intent, including explicit & implicit intents.

Aim: To design a flowchart demonstrating the lifecycle of an android intent, including explicit & implicit intents.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Click on the resume icon
- iv) Search for the flow chart
- v) Drag & drop the shapes on the screen
- vi) Enter the content on the shapes
- vii) Grouping and alignment
- viii) Review and edit
- ix) Save and share.

Result: Hence to design a flowchart demonstrating the lifecycle of an android intent have been successfully implemented.

Exp 25: Create a wireframe for an android app that utilizes background services. Use figma to illustrate the service interactions and data flow.

Aim: To create a wireframe for an android app that utilizes background services using figma.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Design Visual Elements
- v) Make it interactive
- vi) Add icons on the frame
- vii) Incorporate multimedia
- viii) Storyboard animation
- ix) Review & edit the prototype
- x) Save and share.

Result: Hence wireframe for an android app that utilizes background services. Using figma ~~has~~ been created successfully.

Exp 26: Design wireframe for an mobile app showcasing data replication techniques.

Aim: To design a mobile app showcasing data replication techniques using figma.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Design Visual elements
- v) Make it interactive
- vi) Add icons on the frame
- vii)
- viii) Incorporate multimedia
- ix) Review & edit the prototype
- x) Save and share

Result:

Hence mobile app showcasing data replication techniques using figma have been created successfully.

Exp 87: Use figma to an interactive presentation comparing the core Video framework in iOS & the multimedia framework in android.

Aim: Create an interactive presentation comparing the core video framework in iOS & android using figma.

Procedure:

- i) Define presentation structure
- ii) Create a figma project
- iii) Design Visual Elements
- iv) Make it interactive
- v) Add annotations & Explanations
- vi) Incorporate multimedia
- vii) Storyboard animation
- viii) Test the prototype
- ix) Collaborate & Gather feedback
- x) Finalize & Show.

Result: Hence an interactive presentation comparing the Core Video framework in iOS & android using figma have been successfully Completed.

Exp 28: Design a wireframe in figma for a multi-media rich mobile app, incorporating elements from both Core Video & Core media frameworks.

Aim: To design a interface in figma for a multi-media rich mobile app, incorporating elements from both core video & Core media frameworks.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Design visual elements
- v) Make it interactive
- vi) Add icons on the frame
- vii) Incorporate multimedia
- viii) Storyboard Animation
- ix) Review and edit the prototype
- x) Save and Share.

Result: Here a wireframe for a multi-media rich mobile app have been successfully implemented.

Exp 29: Create a wireframe for a collaborative mobile app using figma, showcasing the pt-to-pen interface in real-time.

Aim: To make wireframe for a collaborative mobile app using figma, showcasing the pen-to-pen interactions in real-time using figma.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the frames
- iv) Design Visual Elements
- v) Make it interactive
- vi) Add icons on the frame
- vii) Incorporate Multimedia
- viii) Storyboard animation
- ix) Review and edit the prototype
- x) Save and share.

Result: Home wireframe for a collaborative mobile app, showcasing the pt-to-pen interaction in real-time using figma have been created successfully.

Exp 30: Develop wireframes for a visually rich mobile app with optimized graphics & UI performance, using figma to showcase the design principles.

Aim: To develop wireframes for a visually rich mobile app with optimized graphics & UI performance, using figma to showcase the design principles.

Procedure:

- i) Open figma
- ii) Create a new file
- iii) Select the Frames
- iv) Design Visual Elements
- v) Make it interactive
- vi) Add icons on the frame
- vii) Incorporate multimedia
- viii) Storyboard animation
- ix) Review and edit the prototype
- x) Save and share

Result:

Thus the develop wireframe for a visually rich mobile app with optimized graphics is created successfully.
